AVLEX ANNOUNCES NEW EARSET MICROPHONES

HS-48 and HSP-49 address wide range of applications

Kansas City, MO – April 2013 ... Avlex Corporation, the name audio professionals turn to for world-class wireless technology and microphones, is pleased to introduce two low profile new earset microphones: the HS-48 Single Ear Headworn Microphone and the HSP-49 Single Ear Premium Headworn Microphone. Providing exceptional audio performance with comfort, durability, and the ability to interface with a wide range of wireless systems, these new microphones are well suited for use by worship leaders, educators, business presenters, theatrical and live music performers, plus broadcast professionals.

HS-48 Single Ear Low Profile Headworn Microphone

The HS-48 Single Ear Headworn Microphone employs a back electret condenser capsule measuring a scant 3.5mm in diameter. This standard grade omnidirectional condenser headworn microphone offers a lightweight single ear design that can be worn comfortably for extended periods without distraction—enabling business presenters, for example, to focus on their material. The HS-48 features an adjustable length boom and a distinctive flexible ear-hook made with a self-adjusting soft spring polymer that eliminates the frustration of getting a secure and comfortable fit. With high gain before feedback, this microphone makes it easy to achieve the required audio levels necessary to ensure excellent speech intelligibility for all listeners.

Available in black, cocoa brown, or beige, the HS-48 ships with two screw-on replaceable audio cables, acoustically transparent windscreens, and a MIPRO wireless bodypack adapter. Additional optional adapters are available for use with transmitters from Shure, AudioTechnica, AKG, Sennheiser, ElectroVoice, Lectrosonics, and Sony. Optional Red Dot (RD) adapters have a built-in 15 dB pad for use with MIPRO, AudioTechnica, AKG, ElectroVoice, and Shure beltpacks. The HS-48 Single Ear Headworn Microphone ships with a leatherette case.

HSP-49 Single Ear Low Profile Premium Headworn Microphone

Featuring a premium back electret condenser with a capsule diameter of just 3 mm, the HSP-49 Single Ear Premium Headworn Microphone provides an additional 10 dB of sensitivity compared to its HS-48 sibling—making it well suited to mission critical audio applications such as vocal performance, theatrical use, and broadcast. This omnidirectional condenser headworn microphone offers a lightweight single ear design that can be worn comfortably for extended periods without distraction. The HSP-49 features an adjustable length boom and a distinctive flexible ear-hook made with a self-adjusting soft spring polymer that eliminates the frustration of getting a secure and comfortable fit. With high gain before feedback, the HSP-49 makes it easy to achieve the required audio levels.

Available in black, cocoa brown, or beige, the HSP-49 ships with two screw-on replaceable audio cables, acoustically transparent windscreens, and a MIPRO wireless bodypack adapter. Additional optional adapters are available for use with transmitters from Shure, AudioTechnica, AKG, Sennheiser, ElectroVoice, Lectrosonics, and Sony. Optional Red Dot (RD) adapters have a built-in 15 dB pad for use with MIPRO, AudioTechnica, AKG, ElectroVoice, and Shure beltpacks. To ensure its protection, the HSP-49 Single Ear Headworn Microphone ships with a hard shell case.

Fred Canning, national sales manager for Avlex Corporation, commented on the new earset microphones, "The new Avlex HS-48 and HSP-49 earset microphones offer the right combination of features and functionality to address a wide range of audio tasks. The new ear hook design is effortless and comfortable—eliminating the frustration often encountered by the end user when trying to achieve a secure and custom fit. For applications where the primary focus is speech, the HS-48 makes a terrific choice. For applications where more critical audio quality is required, such as vocal performance or the highest level of speech intelligibility as is necessary for broadcast, the HSP-49 Premium earset merits a good, hard look. I'm confident audio professionals will find much to like with these two new headworn microphones."

The new Avlex HS/HSP Single Ear Low Profile Headworn Microphones carry the following MSRP's:

- HS-48 Beige, Black or Brown: \$210.00
- HSP-49 Beige, Black or Brown: \$275.00

The new Avlex HS/HSP Single Ear Headworn Microphones are in stock and available now.
